## *DEFERRED SUBMITTALS*

---

### **Background:**

This policy provides clarifications and general enforcement guidelines to California Building Code (CBC) Section 107.3.4.1 (Deferred Submittals).

### **Guidelines:**

1. Written request from the architect or engineer of record listing the deferred submittal items and reasons for the deferral shall be submitted to the building official for approval prior to permit issuance.
2. All deferred submittal items shall be clearly listed on the title or cover sheet of the approved set(s) of construction plans.
3. All design criteria of the deferred submittal items shall be stated on original approved plans.
4. The impacts of the deferred submittal items on the entire building shall be included in the original design; i.e. complete load path, point load from girder trusses, fire sprinkler water demand, etc...
5. Submittal documents for deferred submittal items shall be submitted to the architect or engineer of record who shall review them and forward them to the building official with a notation indicating that the deferred submittal documents have been reviewed and that they have been found to be in general conformance with the design of the building.
6. **Deferred submittal items shall be submitted to the building official for review and approval prior to installation. The applicant shall be responsible for coordination of the deferred submittal items and allow adequate review time by the building department. For example; a fire sprinkler system plan shall be submitted, reviewed, approved and available onsite at time of the rough framing inspection or the inspection cannot be conducted.**
7. A separate fee based on time and materials may be charged for review of the deferred submittal items.
