ANTI-ENTRAPMENT DEVICES AND SYSTEMS FOR PUBLIC POOLS AND SPAS

Health and Safety code Sections 116064.1 and 116064.2

*****Use one form for each pump or multiple pumps under the same drain cover*****

This form is to be used to verify compliance with modifications pursuant to the new Health and Safety Code sections 116064.1 and 116064.2. Under Section 116064.2(a) of the Health and Safety Code, effective January 1, 2010, the owner of a public swimming pool shall file this form within 30 days following the completion of construction or installation of anti-entrapment devices or systems in swimming pools. Contact your local Environmental Health Department and Building Department for any necessary plan approval and permit prior to construction or remodel.

SITE INFORMATION

Facility Number: FA _____

Facility Name: _____

Pool Identification (if more than one pool/spa at site): _____

Facility Address: _____

City: _____, CA Zip: _____

Owner Name: _____

Phone No. _____

Owner Address: _____

City: _____, CA Zip: _____

Pool constructed on or after January 1, 2010? YES NO

PUMP INFORMATION

Recirculation Pump

Make/Model: _____ H.P. _____

Jet/Booster Pump

Make/Model: _____ H.P. _____

Feature Pump

Make/Model: _____ H.P. _____

Other Pump

Make/Model: _____ H.P. _____

MAIN DRAIN *(Includes All Suction Outlets Except Skimmer Equalizer Lines)*

Manufacturer of Approved Drain Cover: _____ Model Number: _____

GPM Rating: Floor _____ Wall _____ Install Date: _____ Installed On: Floor Wall

Manufacturer of Approved Drain Cover: _____ Model Number: _____

GPM Rating: Floor _____ Wall _____ Install Date: _____ Installed On: Floor Wall

Main Drain/Jet Suction Pipe Size is _____ inches.

CHECK ONE:

Split Main Drain(s) Minimum 2 feet between covers, hydraulically balances and symmetrically plumbed.

Single Drain – Unblockable Size and shape that a human body cannot sufficiently block to create a suction entrapment.

Single Drain – Not Unblockable One of the following secondary devices required: safety vacuum release system, suction limiting vent system, gravity drainage system, auto pump shut-off system or other equally or more effective system approved by enforcement agency.

Safety vacuum release system bears the following performance standard marking: ATSM F2387 ASME/ANSI Standard A 112.19.17

SKIMMER EQUALIZER LINE(S)

Manufacturer of Approved Suction Cover: _____ Model Number: _____
GPM Rating: Floor _____ Wall _____ Install Date: _____ Installed On: Floor Wall
Skimmer equalizer line(s) pipe size were found to be _____ inches. Number of skimmers: _____

**THE INFORMATION ON ABOVE AND ON THE PREVIOUS PAGE HAS BEEN FIELD VERIFIED TO
COMPLY WITH THE MANUFACTUER'S INSTALLATION REQUIREMENTS BY THE INSTALLER**

I declare that I hold an active:

- California State Contractor license # _____, with classification _____
or
 California State Professional Engineer license # _____

with qualified experience working on public swimming pools and that the information provided above is true to the best of my knowledge, I understand that if I improperly certify this information, I shall be subject to potential disciplinary action at the discretion of the licensing authority in accordance with California Health and Safety Code Section 116064.2.

Contractor/ Engineer Name: _____ Company Name: _____
Company Address: _____ City: _____, CA Zip: _____
Contractor/Engineer Phone Number: _____ Cell Phone Number: _____
Contractor/Engineer Fax Number: _____
Email: _____

Contractor / Engineer Name (PRINT)

Contractor / Engineer Name (SIGNATURE)

Date

OFFICE USE ONLY

Approval By: _____

Date: _____

ANTI-ENTRAPMENT DEVICES AND SYSTEMS FOR PUBLIC POOLS AND SPAS INSTRUCTIONS FOR COMPLETING FORM

- Use one form for each pump or multiple pumps under the same drain cover. For example, a spa with a recirculation pump and a jet pump each with their own set of split drains that terminate under a different drain cover will require two forms. However, two pumps with split drains that terminate under the same drain cover will require only one form.
- All sections of the form must be completed.
- Print legibly.
- Return the completed form to your local Environmental Health Department.

❖ Site Information

- Enter Facility Number in red box at top left of this section
- Facility name – name of facility or OBA (e.g. Oak Glen HOA, Palms Apartments).
- Pool Identification – description of the pool which will identify it when there is more than one pool on the property.
- Facility Address – address, city, state, and zip code of the facility where the pool or pools are located.
- Owner's name – owner, owner's representative, or corporation name.
- Owner's address – address, city, state, zip, and telephone number of the owner or owner's representative.
- Indicate if the pool was constructed on or after January 1, 2010.

❖ Pump Information

- Identify the type of pump that is connected to the drain. If two pumps terminate under one set of split drains (e.g. one side of a split suction drain is used for both a recirculation pump and a jet pump), describe both pumps. For each pump, provide the make, model number, and horsepower. Remember, complete a separate compliance form if the additional pump is connected to a different drain cover.

❖ Main Drain *(Includes All Suction Outlets Except Skimmer Equalizer Lines)*

- Provide the manufacturer; make and model; and the date the drain cover was installed.
- Provide the floor and wall flow rating in gallons per minute for the drain cover. Note: If there are two different drain covers (e.g. one on the wall and one on the floor), there is space on the compliance form to complete drain cover information for each drain.

- Indicate the size of the pipe terminating at the main drain or jet suction.
- Check a box to indicate the configuration of the drain.
 - **Split Main Drains** - means there are two drains that are hydraulically balanced and symmetrically plumbed and are separated by a distance of at least three feet in any dimension between the suction outlets.
 - **Single Drain - Unblockable** means there is one drain approved to be unblockable so that a human body cannot sufficiently block it to create a suction hazard.
 - **Single Drain - Not Unblockable** - means there is a single drain which can be sufficiently blocked by a human body to create a suction hazard. This type of drain must be protected by an approved safety vacuum release system or other equally or more effective system. Provide the type of device installed, manufacturer, model, and indicate which type of performance standard is marked on the device (ASTM F2387 or ASME/ANSI standard A112.19.17).

❖ **Skimmer Equalizer Line(s)**

- Provide the manufacturer; make and model; and the date the drain cover was installed.
- Provide the floor and wall flow rating in gallons per minute for the drain cover. Note: If there are two different drain covers (e.g. one on the wall and one on the floor), there is space on the compliance form to complete drain cover information for each drain.
- Indicate the size of the skimmer equalizer line pipe.
- Indicate number of skimmers.

❖ **Contractor/Engineer Certification Section**

- Enter a valid California State Contractor's license number.
- Enter the Contractor's license classification (or enter California Professional Engineer's license number, if applicable).
- Enter the Contractor's/Engineer's name and the company they are working for.
- Enter the company address, city, state, zip code, telephone number, cell phone number, FAX number, and email for the Contractor/Engineer.
- Print the name of the Contractor/Engineer.
- The Contractor or Engineer must sign the form.
- Enter the date the form was signed.
