

# Nevada County Egress/Ingress Fire Safety Project

## Detailed Description of Work

This project consists of removing all vegetation with stems and trunks smaller than six inches in diameter within 15 feet of the edge of the traveled way on approximately 200 miles of County-maintained roads as shown in the table below. Work will be performed within the County’s existing right-of-way.

Vegetation treatment specifications include the following:

- All grasses and brush will be cut to under 3 inches.
- Scotch broom will be removed with plant roots intact and transported to a disposal site.
- All manzanita and non-sprouting shrubs will be removed.
- Willows and riparian shrubs will be mowed or cut.
- Sprouting shrubs, including but not limited to buckbrush, deer brush, and toyon, will be cut and sprayed with an approved herbicide.
- Blackberry will be mowed or weed whacked to no more than 3 inches high and then sprayed with an approved herbicide.
- All trees to remain within the work area, regardless of size, will be limbed up to a height of at least 15 feet above ground level.

All downed vegetation will be removed from the clearing sites within five days of cutting. Sweeping will be done at the end of each day to remove any loose material from roadways, driveways, ditches and gutters. All disturbed soils will be covered with approved erosion control measures.

The Contractor will clear brush on both sides of the road to 15 feet from the edge of pavement or edge of graded road except for the following situations:

- If a fence or maintained landscaping exists parallel to the roadway, discontinue clearing activities at fence line or at start of landscaping providing landscaping is over 2 feet from the edge of pavement.
- Landscaping encroaching over the pavement, roadside ditches and/or within 2’ of the edge of pavement shall be removed with all trimming completed in a neat and clean manner.
- No clearing will be done within 20 feet of either side of the centerline of a watercourse of wetland.

The Egress/Ingress Fire Safety Project is part of California Climate Investments, a statewide program that puts billions of Cap-and-Trade dollars to work reducing GHG emissions, strengthening the economy, and improving public health and the environment— particularly in disadvantaged communities. The Cap-and-Trade program also creates a financial incentive for industries to invest in clean technologies and develop innovative ways to reduce pollution. California Climate Investments projects include affordable housing, renewable energy, public transportation, zero-emission vehicles, environmental restoration, more sustainable agriculture, recycling, and much more. At least 35 percent of these investments are located within and benefiting residents of disadvantaged communities, low-income communities, and low-income households across California. For more information, visit the California Climate Investments website at: [www.caclimateinvestments.ca.gov](http://www.caclimateinvestments.ca.gov).
